

Chemex Newsletter Issue #1

Welcome to the latest edition of CHEMEX Environmental International Ltd newsletter. We hope that these news items and updates are of interest and that the links provide adequate supporting information. Should you have any queries pertaining to these news items please do not hesitate to [contact us here](#)

- **Accreditation Update** - Chemex can now offer mercury analysis in soils by CVAFS accredited to mCERTS. To see more information on metals analysis in soils at Chemex please click here

<http://www.chemex.co.uk/environmental/contam/soil/inorganics>

For more details on this, and other accredited methods at Chemex please check our scope of accreditation here <http://www.chemex.co.uk/quality/labacc/ukas>

- **Website FAQ Section** - Chemex have added a frequently asked questions (FAQ) section to the web site to provide our clients with a useful resource to obtain quick information on many of their most common questions. This will be updated on an ongoing basis and we hope that clients will check back regularly for information. The FAQ section can be accessed at the following location <http://www.chemex.co.uk/faq> Additional questions can be submitted by mailing <mailto:analysis@chemex.co.uk>

- **Chemspec Report** - In June Chemex exhibited at [Chemspec](#) for the first time.

The event was held in Munich, with visitors from across the globe. The Chemex stand was located in the Reach Ready Corner reflecting the fact that Chemex holds Reach Ready Status and the Reach regulations are expected to generate significant workloads for laboratories – [view our Reach page here](#).

The event was a great success with a large number of visitors to our stand. The level of interest indicates that there may be a shortage of capacity in laboratories as the REACH guidelines take effect, so at Chemex we are advising all clients to ensure that their tests are booked as early as possible to beat the rush.

- **Staff News** - We continue to extend the scope of our activities and increase the capacity of the laboratory. With this in mind Chemex is pleased to announce the appointment of 7 new staff, across 4 departments in the last few weeks:

We wish all our new recruits success at Chemex.
